

Applicable to models:HS-4040
HS-4055USA/Canada
H2090
H2130

Kit of forced Ventilation

HS-4040 / HS-4055 (H2090 / H2130)

We have available as an option, a new KIT OF FORCED VENTILATION (code 796102), applicable to washer extractors model HS-4040 and HS-4055 (H2090 and H2130) when the ambient temperature of the laundry is very high, superior to 40-45°C.

The function of the KIT (code 796102) is just to force the intake of ambient air, increasing its flow, so that the efficiency of the inverter improves and possible stops by overheating are avoided.
