To: CONTINENTAL GIRBAU, INC. PRODUCT DISTRIBUTORS

From: Jay Leitz, Parts Department

Subject: New H5020 "Aurora" Washer/Extractor Fill Hoses Now Available!

Continental Girbau, Inc. is pleased to offer to its distributors a new washer fill hose kit designed specifically for our new H5020 "Aurora" washer/extractor, and can also be used with any standard top load washer. Each kit consists of two 6' long, 3/8" inside diameter high pressure rubber hoses with standard 3/4" hose fittings, as well as strainers and gaskets for each hose. In addition, each hose has a 90 degree brass bend at one end to more easily accommodate those "tight" spaces behind the washer. This kit part number is #285363. Distributor net cost for each kit is \$11.00. Hoses are shipped FOB Oshkosh, WI 54904 or as designated by Continental Girbau, Inc.

Continental Girbau, Inc. also continues to offer to its distributors our heavy duty, high pressure 3/4" diameter fast fill hose for its line of larger front load washer/extractors. Each 5' hose having a standard 3/4" hose fitting at each end and gaskets has a part number of #999999, and has a distributor cost of \$7.98. We also offer larger 1" and 2" hoses for our largest washer/extractor models.

Any of these hoses can be ordered by faxing your order to (800) 256-1086.

Continental Girbau, Inc. would like to thank its distributors for their continued support. Please feel free to contact myself at 1-800-256-1073 extension 16 or Matt Lehman at extension 31 with any questions regarding these hoses. We thank you and look forward to supporting your parts requirements in the future.
