## PRODUCT BULLETIN No. 41701

**Date:** September 17, 2002 (revised)

**Subject:** L-Series Door Handle 27314, Screw 147694 & Bolt 272609

The screw (part #147694), handle (part #273144) and locking bolt (part #272609) for all L-Series machines have been changed. In order to retrofit the new handle and pin to existing machines you will need to order the handle and pin from our parts department:

Old Part#	New Part#	Description	Dist. \$ Cost
147694	150862*	Screw/Pin	0.21
273144	408823*	Handle	11.34
272609	408831	Locking Bolt	31.08
304113	304113*	Decal	1.26

\* In order to retrofit the new handle and pin you remove the existing screw and handle from the locking bolt. Place new handle onto bolt and align holes correctly. Using a 13/64" drill bit drill through handle and bolt. Install the new pin into drilled opening and use a medium C-clamp to press the new pin through both parts until pin is flush with handle. Install new handle decal.

The 13/64" drill bit can be purchased through our parts department or can be purchased through a local supply house.

Machines leaving the factory with the new screw/pin, begin with the following serial numbers:

MODEL	Serial #
L1018	1003332
L1030	1014389
L1040	1101684
L1050	1022422
L1075	1030521
L1125	1040171

If you have any questions please call me at 1-800-256-1073 ext 15.
